Statement of Total Project Costs Re-Valuation

Date: _____ APN: _____ Permit # _____

Project Address: _____

Project Description: _____

The City of Mill Valley, similar to other cities, requires that building permit fees be re-evaluated at the conclusion of the project. Property owners agree to the re-valuation of the permit fees by signing the Acknowledgment of Construction Responsibility form prior to the issuance of the building permit. If the total cost of the project exceeds the permit valuation on the building permit, the owner shall pay the additional fees based on the difference between the original estimated valuation and the final valuation. (Authority: California Building Code Sections 107.1 & 107.2.)

If the City holds an unused damage deposit, it will be applied toward any fees that are due.

By City policy, actual construction valuation includes all project costs, including costs for irrigation and lighting systems associated with landscaping. Please note that costs for design professional and plant materials should be excluded, as well as any fees previously paid to the City.

Please provide the total cost of the project, along with contact information as requested below and return this form to the City of Mill Valley Building Department, 26 Corte Madera Ave., Mill Valley, CA 94941 prior to requesting Final Inspection of your Building Permit project.

Please be advised that if the City feels that your resubmitted valuation does not conform with the level and extent of construction that occurred, we may require project estimation from a third party at the property owner's expense.
